

PRESS RELEASE

9th January, 2017

O. KLEINER AG – production has been entirely carbon neutral since 01.01.2016 – new Sustainability Report sets out the details.

Since January 2016 the entire production is carbon neutral. To achieve this, we use 100% ecological power and 30% biogas. The CO₂ emissions from the remainder of our gas requirements, as well as other CO₂ emissions, are offset in a project from our longstanding partner, „myclimate“. At the climate summit in Paris in 2015, the project we selected was awarded the „Momentum for Change Award“ as a „game changing global climate activity“ by Ban Ki-Moon, UN Secretary General at that time.

To explain our motivations behind this decisive step within our Environmental Programme, we have decided to publish an annual **Sustainability Report** which will extensively document both sustainability measures taken and comparable year on year statistics.
